Q1)

//Q:1 Write a C++ program to print the total number of populations in Punjab, Sindh, KPK, and Balochistan using a switch case.

```
#include <iostream>
using namespace std;

int main() {
    int Punjab, Sindh, Balochistan, KPK;

    Punjab = 127474000;
    Sindh = 54858515;
    Balochistan = 20037659;
    KPK = 39372462;

    cout << "Enter a number to get information about people:" << endl;
    int n;
    cout << "Enter 1 for Punjab" << endl;
    cout << "Enter 2 for Sindh" << endl;
    cout << "Enter 3 for Balochistan" << endl; // Fixed a single quote that should be a semicolon
    cout << "Enter 4 for KPK" << endl;
    cin >> n;

    switch (n) {
        case 1:
            cout << "Population of Punjab: " << Punjab << endl;
            break;
        case 2:
            cout << "Population of Sindh: " << Sindh << endl;
            break;
        case 3:
            cout << "Population of Balochistan: " << Balochistan << endl;
            break;
        case 4:
            cout << "Population of KPK: " << KPK << endl;
            break;
        default:
            cout << "Invalid input" << endl;
            break;
    }
    return 0;
}
```

The screenshot shows a Windows command prompt window with the file path "C:\Users\De\l\Desktop\hi\As:". The program prompts the user to enter a number to get information about people. The user enters '2'. The program outputs the population of Sindh as 54858515. The process returned 0 (0x0) and the execution time was 2.063 s.

```
Enter a number to get information about people:
Enter 1 for Punjab
Enter 2 for Sindh
Enter 3 for Balochistan
Enter 4 for KPK
2
Population of Sindh: 54858515
Process returned 0 (0x0) execution time : 2.063 s
Press any key to continue.
```

The screenshot shows a Windows command prompt window with the file path "C:\Users\De\l\Desktop\hi\As:". The program prompts the user to enter a number to get information about people. The user enters '3'. The program outputs the population of Balochistan as 20037659. The process returned 0 (0x0) and the execution time was 1.860 s.

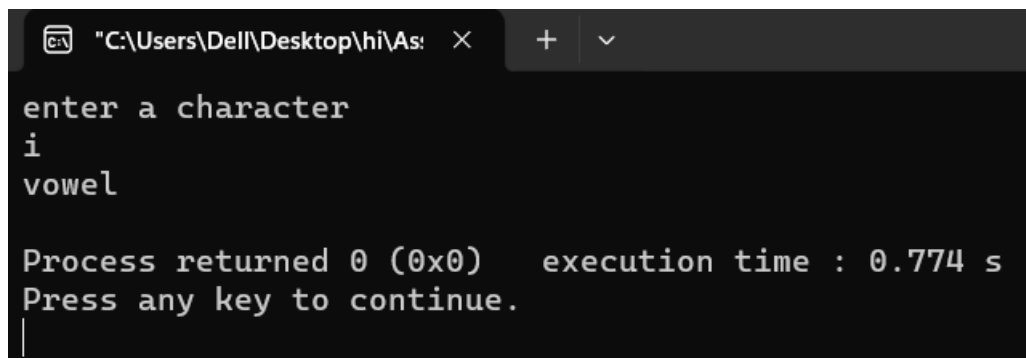

```
Enter a number to get information about people:
Enter 1 for Punjab
Enter 2 for Sindh
Enter 3 for Balochistan
Enter 4 for KPK
3
Population of Balochistan: 20037659
Process returned 0 (0x0) execution time : 1.860 s
Press any key to continue.
```

Q2)

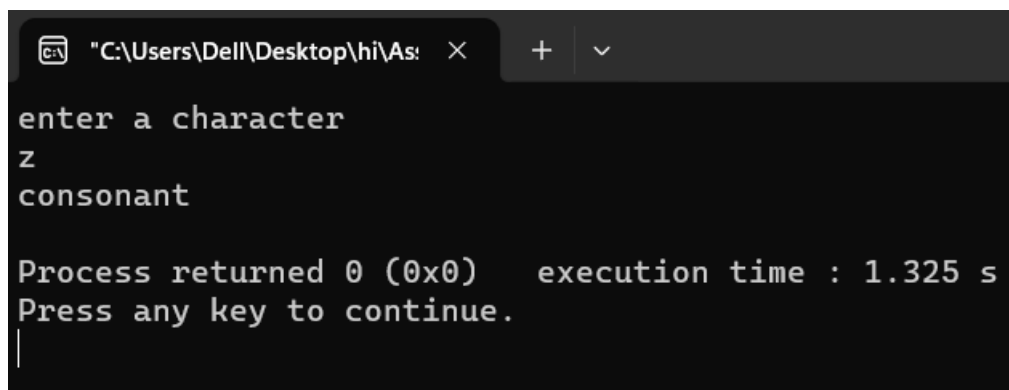

// Q 2) Write a C++ program to check whether an alphabet is a vowel or consonant using a switch case.

```
#include <iostream>
using namespace std;
int main(){
    char a;
    cout<<"enter a character"<<endl;
    cin>>a;
    switch(a)
    {
        case 'a': cout<<"vowel"<<endl;
        break;
        case 'e': cout<<"vowel"<<endl;
        break;
        case 'i': cout<<"vowel"<<endl;
        break;
        case 'o': cout<<"vowel"<<endl;
        break;
        case 'u': cout<<"vowel"<<endl;
        break;

        default:
            cout<<"not vowel"<<endl;
    }
}
```

A screenshot of a Windows command prompt window. The title bar shows the file path "C:\Users\DeII\Desktop\hi\As:". The prompt displays the text "enter a character" followed by the user input "i". The output is "vowel". Below the output, it says "Process returned 0 (0x0) execution time : 0.774 s" and "Press any key to continue." with a cursor on a new line.

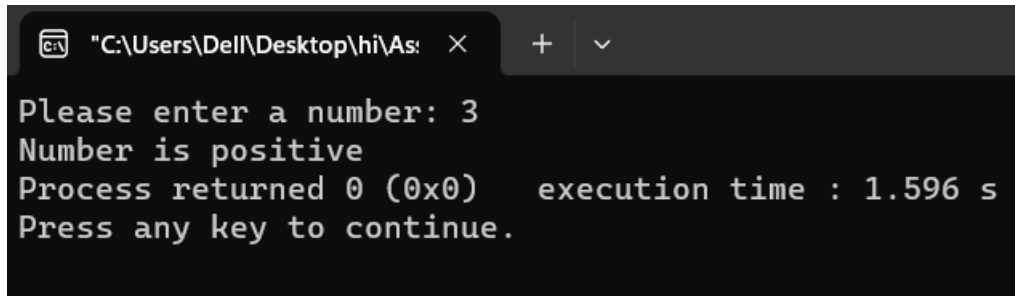

A screenshot of a Windows command prompt window. The title bar shows the file path "C:\Users\DeII\Desktop\hi\As:". The prompt displays the text "enter a character" followed by the user input "z". The output is "consonant". Below the output, it says "Process returned 0 (0x0) execution time : 1.325 s" and "Press any key to continue." with a cursor on a new line.

Q3)

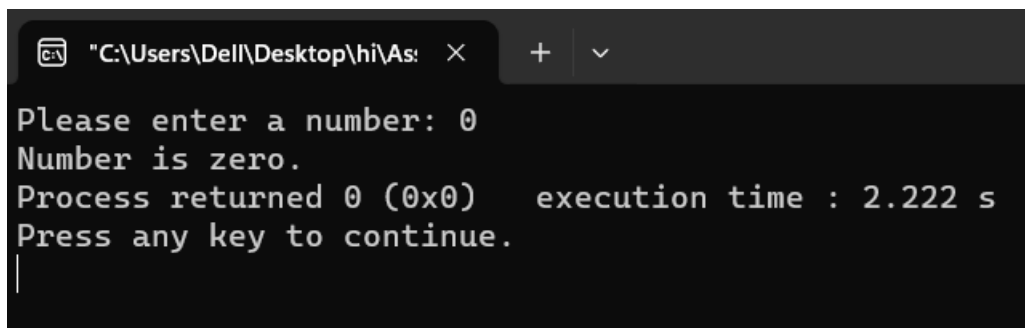

```
//Q3) Write a C++ program to check whether a number is positive, negative, or zero using a switch case.
#include<iostream>
using namespace std;

int main(){
    int num;
    cout << "Please enter a number: ";
    cin >> num;
    switch(num<0){
        case 1:
            cout << "Number is negative" << endl;
            break;
        default:
            switch(num>0){
                case 1:
                    cout << "Number is positive";
                    break;
                default:
                    cout << "Number is zero.";
                    break;
            }
    }
    return 0;
}
```

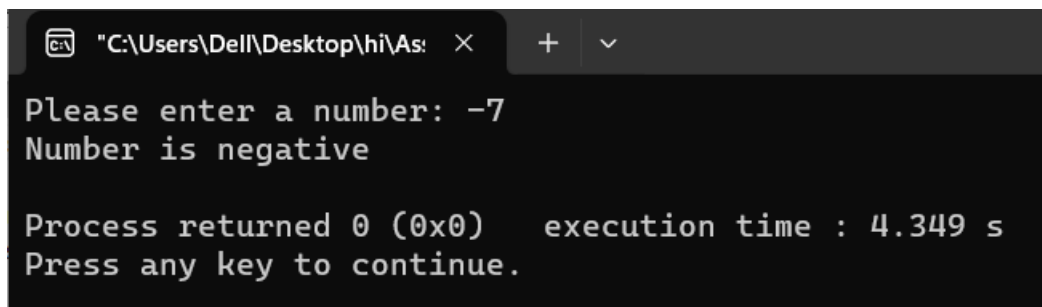

"C:\Users\Dell\Desktop\hi\As: × + ▾

Please enter a number: 3
Number is positive
Process returned 0 (0x0) execution time : 1.596 s
Press any key to continue.

"C:\Users\Dell\Desktop\hi\As: × + ▾

Please enter a number: 0
Number is zero.
Process returned 0 (0x0) execution time : 2.222 s
Press any key to continue.
|

"C:\Users\Dell\Desktop\hi\As: × + ▾

Please enter a number: -7
Number is negative
Process returned 0 (0x0) execution time : 4.349 s
Press any key to continue.

Q4)

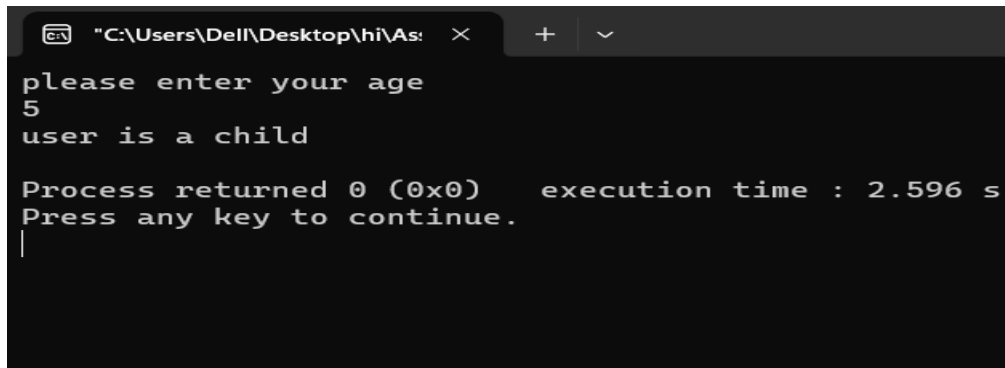

//Q4) Write a C++ to find out whether a person is an adult, teenager, or child using nested if-else.

```
#include <iostream>
using namespace std;

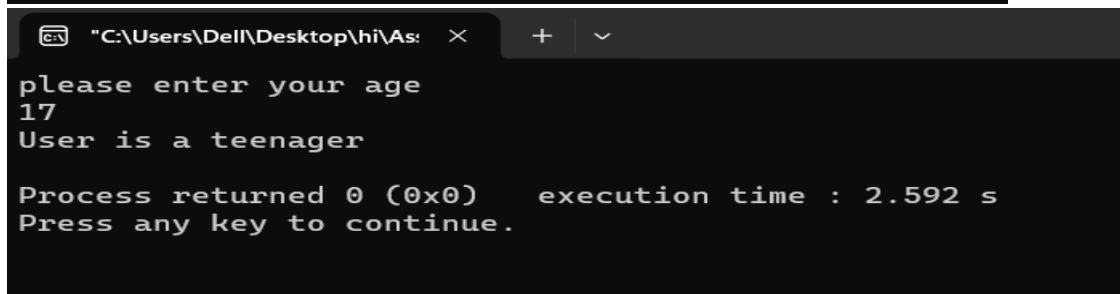

int main() {
    int age;
    cout<<"please enter your age"<<endl;
    cin>>age;

    if(age>=13 && age<=19){
        cout<<"User is a teenager"<<endl;
    }
    else if (age>19){
        cout<<"user is an adult"<<endl;
    }
    else{
        cout<<"user is a child"<<endl;
    }

    return 0;
}
```

A screenshot of a Windows command prompt window. The title bar shows the file path "C:\Users\Del\\Desktop\hi\As:". The prompt displays the text "please enter your age", followed by the user input "5". The program then outputs "user is a child". At the bottom, it shows "Process returned 0 (0x0) execution time : 2.596 s" and "Press any key to continue." with a cursor on a new line.

A screenshot of a Windows command prompt window. The title bar shows the file path "C:\Users\Del\\Desktop\hi\As:". The prompt displays the text "please enter your age", followed by the user input "17". The program then outputs "User is a teenager". At the bottom, it shows "Process returned 0 (0x0) execution time : 2.592 s" and "Press any key to continue." with a cursor on a new line.

A screenshot of a Windows command prompt window. The title bar shows the file path "C:\Users\Del\\Desktop\hi\As:". The prompt displays the text "please enter your age", followed by the user input "66". The program then outputs "user is an adult". At the bottom, it shows "Process returned 0 (0x0) execution time : 1.996 s" and "Press any key to continue." with a cursor on a new line.

Q5)

//Q5) Write a C++ program that takes three number from the user and find the greatest number out of the three numbers using nested if-else statements.

```
#include <iostream>
using namespace std;

int main() {
    int num1, num2, num3;

    cout << "Enter the first number: ";
    cin >> num1;

    cout << "Enter the second number: ";
    cin >> num2;

    cout << "Enter the third number: ";
    cin >> num3;

    if (num1 > num2 && num1 > num3) {
        cout << "num1 is the greatest number" << endl;
    }
    else if (num2 > num1 && num2 > num3) {
        cout << "num2 is the greatest number" << endl;
    }
    else {
        cout << "num3 is the greatest" << endl;
    }

    return 0;
}
```

"C:\Users\DelI\Desktop\hi\As: X

```
Enter the first number: 4
Enter the second number: 5
Enter the third number: 6
num3 is the greatest
```

```
Process returned 0 (0x0)   execution time : 3.481 s
Press any key to continue.
```

Q6)

//Q6) Write a C++ program to check whether the alphabet entered by the user is Vowel or Consonant using nested if-else.

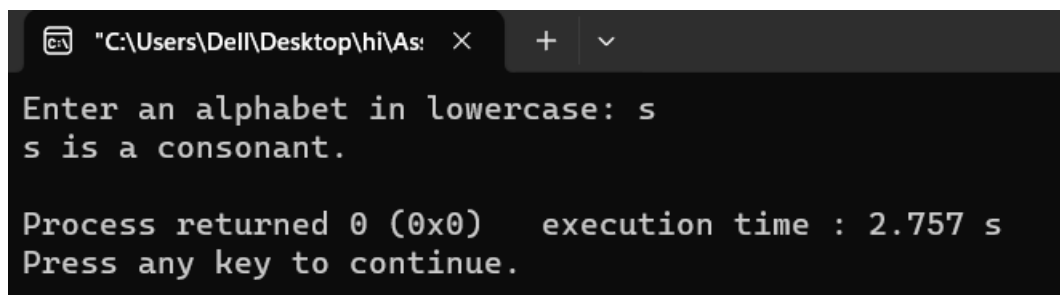

```
#include <iostream>
using namespace std;

int main() {
    char ch;

    cout << "Enter an alphabet in lowercase: ";
    cin >> ch;

    if (ch >= 'a' && ch <= 'z') {
        if (ch == 'a' || ch == 'e' || ch == 'i' || ch == 'o' || ch == 'u') {
            cout << ch << " is a vowel." << endl;
        } else {
            cout << ch << " is a consonant." << endl;
        }
    } else {
        cout << "Invalid input. Please enter a lowercase alphabet." << endl;
    }

    return 0;
}
```

A screenshot of a Windows command prompt window. The title bar shows the file path "C:\Users\Dell\Desktop\hi\As:". The prompt displays the text "Enter an alphabet in lowercase: s" followed by the output "s is a consonant.". Below this, it shows "Process returned 0 (0x0) execution time : 2.757 s" and "Press any key to continue.".

A screenshot of a Windows command prompt window. The title bar shows the file path "C:\Users\Dell\Desktop\hi\As:". The prompt displays the text "Enter an alphabet in lowercase: e" followed by the output "e is a vowel.". Below this, it shows "Process returned 0 (0x0) execution time : 1.954 s" and "Press any key to continue.".
